Duck, Duck, Goose?

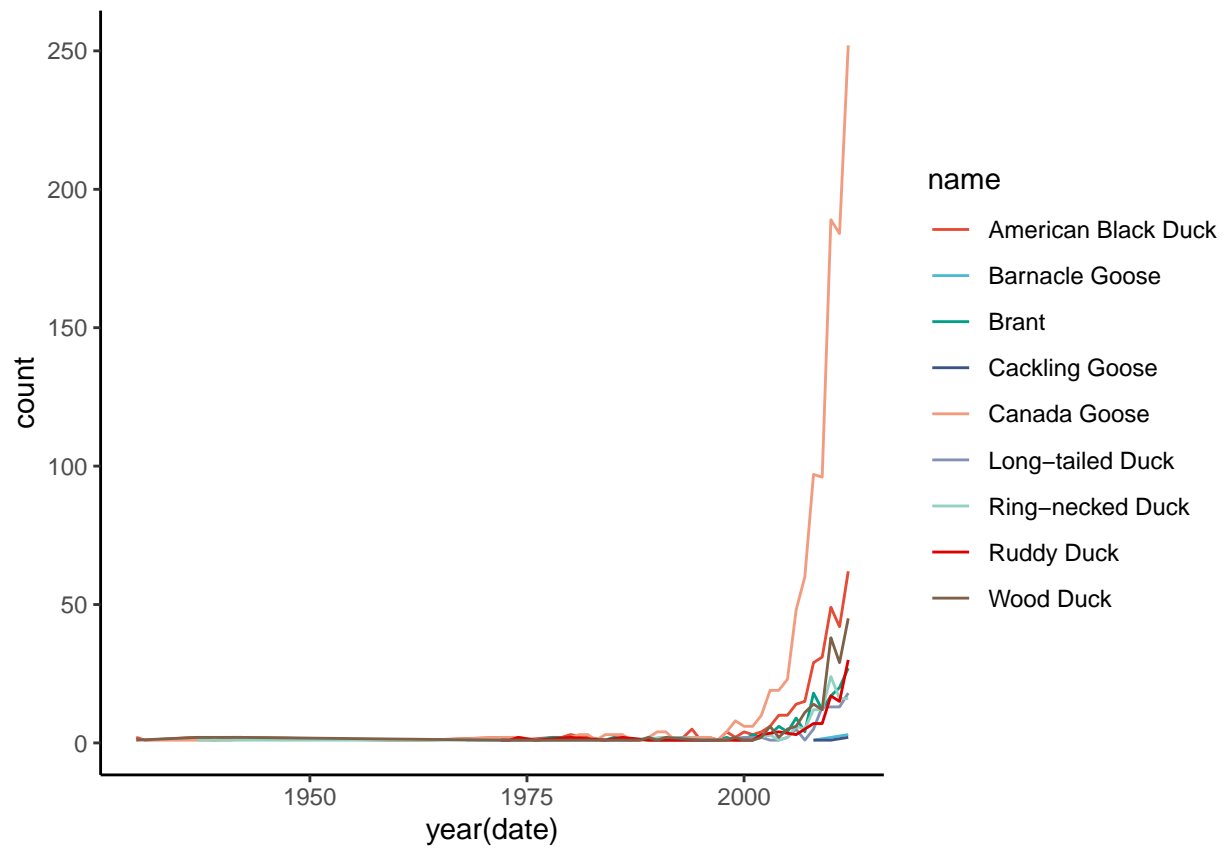

An anatidaephobic's guide to the state of New York

Some people are afraid of ducks and geese, and I don't blame them. They are horrifying little honkers. Thankfully, with the help of the crowdsourced Ebird dataset maintained by Cornell University, we can learn more about where these menaces are most often seen so they can be properly avoided.

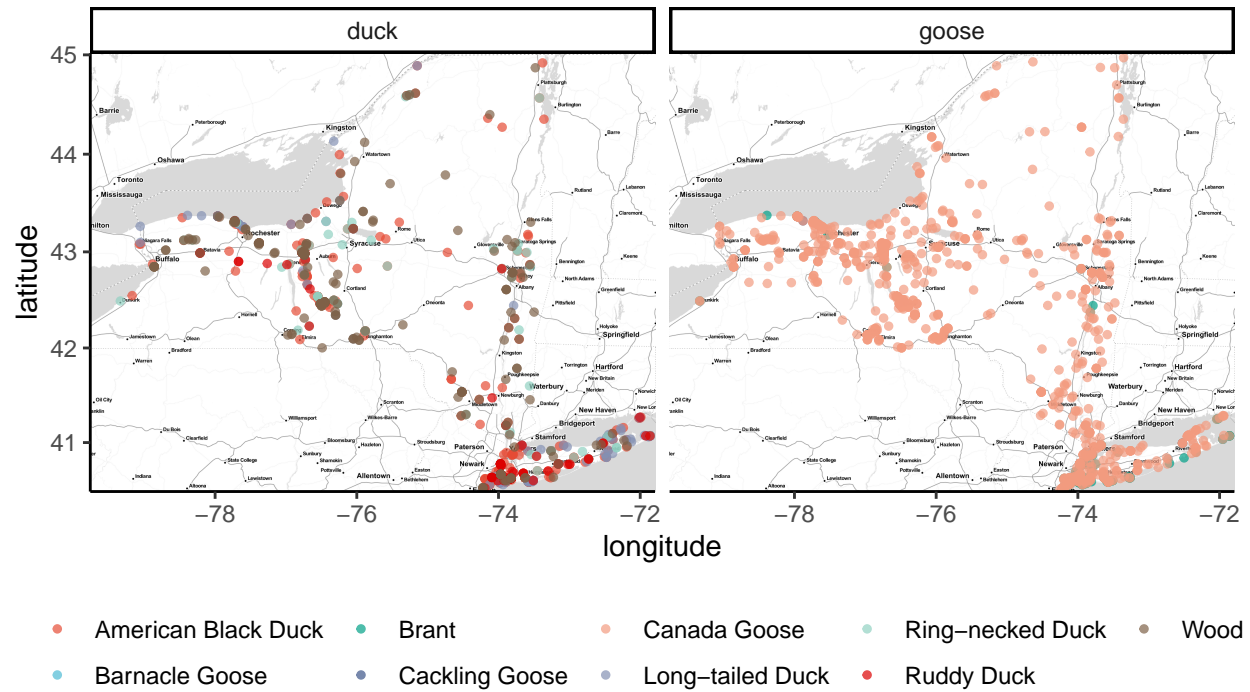

You're not crazy, it is getting worse!

As you can see in figure 1 below, the number of spottings of these birds are on the rise. If this pattern continues, [insert more here]

```
## 'summarise()' has grouped output by 'name'. You can override using the
## '.groups' argument.
```

Fascinating fowel and where to find them

Data: Ebird Archive | Plot: @clstacy

Note that the `echo = FALSE` parameter was added to the code chunk to prevent printing of the R code that generated the plot.
